

- Web based
- Optimize costs
- Increase productivity
- Track efficiency
- Allocate costs to various cost centers
- Customizable tariffs
- Improve customer service
- Identify fraudulent use

SpeechBill is a web based call accounting & costing solution which enables costing, budgeting and tracking of all communication costs. As a management tool, SpeechBill can generate reports on telecom usage by allocating costs to departments, cost & profits centers and even customers. Analysis of productivity, call traffic and costs can be accessed by reports or graphical representations or dashboards, even remotely, based on call detail records (CDR).

Key features
